

The API Quarterly

July 31, 2014

Summer 2014

Volume 5 - Issue 2

API is an Indiana Company to Watch!

API Alliance has been recognized by the Indiana Small Business Development Center (ISBDC) as a company to watch! According to the ISBDC website, "Indiana Companies to Watch celebrates Indiana based high-

performing, established companies (existence for 3+ years), that gross under \$100 million. Known for their performance in the marketplace, innovative products, unique processes or philanthropic actions, these companies represent a wide range of industries from all corners of Indiana. They make an astounding impact on the state's economy by collectively providing thousands of jobs and contributing millions of dollars of revenue."

"We are excited that we are being recognized for our dedication to our customers and our community," said Mike Gigli - API's General Manager. Gigli continued, "We have worked hard to become a company that is known as innovative and a leader in the state."

Expanded Production Floor Capabilities

We are happy to introduce our expanded production floor capabilities. We have added a slide-line assembly system, which is currently up and running. We will also be adding additional surface mount and thru-hole equipment in the fourth quarter of this year.

Slide-Line Assembly

Please contact us about our additional capabilities and your specific application.

**Celebrating 20 Years of
Engineering and
Manufacturing Excellence!
1994 - 2014**

Featured Employee... Angela Hoffman - Marketing

Introducing Angela Hoffman - Marketing. Angela is responsible for coordinating all aspects of marketing for API Alliance. Angela grew up in Fort Wayne, IN. She graduated from Indiana Purdue Fort Wayne (IPFW) with a bachelor's degree in communications.

Hoffman

Angela is married and has 3 children. She enjoys spending time with her family, photography, and watching her children play sports. She has been a valuable API team member since 2007.

Engineering Facts

The Segway is a 2 wheeled, self balancing personal transport vehicle which utilizes the principles of the gyroscope to maintain stability.

The word engineer comes from a Latin word meaning 'cleverness'.

The tallest wind turbine in the world has rotor tips that reach over 200 meters (656 feet) above the ground.

Our Promise To You...

To utilize our proficiency in electronic manufacturing, electro-mechanical assembly and engineering services to become a long-lasting "**Partner in Production.**" These alliances are to be based upon excellent communication, mutual trust, proactive participation and a complete understanding of our customer's goals. We shall offer unwavering technical and project management assistance to the level expected from these customer relationships.
